
CRZ Series Fluorescent Pigments

CRZ pigments have excellent brightness good heatstability and less plate-out. They are recommended for applications of injection, blow moldings, extrusion where excellent heatstability, strong colors and lightfastness are needed as well as no formaldehyde release. CRZ pigments are compatible with various types of plastics.

Applications:

- Coloring for various plastics
- Injection moldings,blow moldings etc.

Available Colors:

CRZ-11	Pink	CRZ-16	Orange yellow
CRZ-12	Cerise	CRZ-17	Yellow
CRZ-13	Red	CRZ-18	Green
CRZ-14	Red orange	CRZ-21	Magent
CRZ-15	Orange		

Technical Properties:

Average Particle Size	≤100μm	
Softening Point	≥120℃	
Application Temperature	180-260℃	
Full shade(compared with the standard)	similar	
Color strength(compared with the standard)	100±5%
